

## PROBE STATION HAVING MULTIPLE ENCLOSURES

## ABSTRACT OF THE DISCLOSURE

5 A probe station for probing a test device has  
a chuck element for supporting the test device. An  
electrically conductive outer shield enclosure at least  
partially encloses such chuck element to provide EMI  
shielding therefor. An electrically conductive inner  
shield enclosure is interposed between and insulated from  
10 the outer shield enclosure and the chuck element, and at  
least partially encloses the chuck element.
